

SSH Login without a password query

Source System

- `ssh-keygen -t rsa`
- keep filenames as recommended
- don't enter a passphrase
- `cd ~/.ssh`
- `ls -l` shows to keys (`id_rsa.pub` =public key) and (`id_rsa` = private key)
- `scp id_rsa.pub <target system>:~/.ssh/authorized_keys`

done

login from `user1@source-system` to `user1@target-system` should work without a password verification
